SUMMARY

Software Engineer experienced in building web applications and RESTful APIs using React, TypeScript, C#, Node.js, and PostgreSQL. Skilled in developing responsive frontend interfaces and backend systems with a focus on clean architecture, data integrity, and maintainability. Built applications with React and Tailwind CSS and secure ASP.NET Core APIs using JWT authentication, Entity Framework Core, and OpenAPI documentation.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL

Backend Frameworks: ASP.NET Core, Entity framework Core, Node.js, Express.js

Frontend Frameworks: React.js, Next.js

Databases: MySQL, PostgreSQL, SQLite, Firestore

Tools: Git, Swagger/OpenAPI

API & System Architecture: RESTful API Design, JWT Auth & RBAC, Concurrency Control, Transaction Management.

WORK EXPERIENCE

Codeware Nigeria — Software Developer Intern

Lagos, Nigeria | 4-Month Internship

- Developed web applications and responsive user interfaces using Vue.js, React, and TypeScript.
- Developed backend functionality and RESTful APIs using Node.js and Express.js.
- Built reusable frontend components and implemented application features based on project requirements.
- Collaborated with other developers and interns to develop, test, debug, and improve applications. • Taught and mentored fellow interns on React, Vue.js, TypeScript, and web development practices.

PROJECTS

CoBuild — Full-Stack Collaboration Platform

Live Url: [Cobuild](#)

Tech: Node.js, Typescript, Express, Firestore

- Built and maintained the frontend and backend for a production application used by real users.
- Developed REST APIs and database-backed features using Node.js, Express.js and, Firestore.
- Built database models and relationships supporting users, projects, and application data.
- Implemented responsive interfaces and integrated them with backend services.
- Investigated and fixed production issues across the application stack.

Developer Habit Tracker

GitHub: [Dev Habit Tracker](#)

Tech: C#, ASP.NET, Entity Framework Core, PostgreSQL

Developed a production-style RESTful API for tracking developer habits using ASP.NET Core and PostgreSQL.

- Implemented JWT authentication and role-based authorization with secure user access.
- Built HATEOAS-compliant REST endpoints with CRUD operations, pagination, filtering, and sorting.
- Added request validation, global exception handling, and consistent API error responses.

- Implemented database persistence with Entity Framework Core and optimized data access with indexing.

Mobile Game API

GitHub: [Game API](#)

Tech: C#, ASP.NET, Entity Framework Core, SQLite

Developed a RESTful Game API with secure JWT authentication and player management.

- Implemented JWT authentication and authorization.
- Built CRUD endpoints with pagination, filtering, and sorting.
- Added request validation and global exception handling.
- Documented the API with Scalar/OpenAPI.

Restaurant Ordering API

GitHub: [Restaurant API](#)

Docs: [Restaurant Docs](#)

Tech: Node.js, Express.js, TypeScript, MySQL

Developed a production-style REST API for restaurant ordering with role-based authentication, transaction-safe order processing, and lifecycle management.

- Designed a normalized relational database schema for restaurants, menus, orders, and users.
- Implemented JWT-based authentication and role-based authorization using a service–repository architecture.
- Designed a transaction-safe order processing system using MySQL transactions to ensure data consistency during concurrent operations.
- Prevented invalid order state transitions through concurrency-safe business logic.
- Deployed the API on Render with a managed MySQL database.

Postframe — Content-to-Visual Composition Tool

GitHub: [Postframe GitHub](#)

Live: [Postframe](#)

Tech: React, Typescript, Tailwind CSS

- Designed and built a browser-based tool for composing technical content, social posts, quotes, and threads into shareable visual formats.
- Built feature-based creation flows for different content types with reusable UI components and shared composition infrastructure.
- Implemented structured code-post composition supporting alternating explanations and syntax-highlighted code blocks across multiple programming languages.
- Designed a minimal, editorial interface focused on content composition, preview, and client-side export.

EDUCATION

Ladoke Akintola University of Technology

B.Tech. in Computer Engineering

Ogbomosho, Oyo State

Graduated: October 2025
